STRATUS  
CENTER  
for  
Medical  
Simulation

## *Managing Births in the Emergency Setting*

The course is designed to provide hands on training in the management of normal and complicated deliveries. The course will also help providers manage the high risk, low frequency events around deliveries.

Participants will be given the opportunity to practice complications including shoulder dystopia, breech delivery, eclampsia, post partum hemorrhage and multiple gestation. Participants will be actively involved in hands on practice as well as small group discussion.
