

Aerosol Disposable Patient Circuit

Streamlined delivery of aerosol medication with Hi-VNI® Technology

- Deliver aerosol medication without disrupting therapy
- Minimal clinician condensate management
- Circuit ready to go right out of the bag
- Compatible for both continuous and intermittent nebulization

Aerosol Delivery with Hi-VNI Technology

Safe and Effective

With the Aerosol Disposable Patient Circuit (ADPC), clinicians have the option of delivering aerosol medication concurrently with Hi-VNI® Technology, either continuously or intermittently, without the need for a mask or pausing therapy.

- Designed specifically for use with Aerogen Solo
- Designed for patient comfort with an integrated mixing chamber
- May be better tolerated than an aerosol mouthpiece or mask¹
- Aerosol medication delivery for pediatric obligate nose breathers
