Andexxa is indicated to rapidly reverse anti factor A activity for patients experiencing life threatening bleeds taking Rivaroxaban Xarelto or Apixipan Eliquis. Andexxa acts as a factor 10a decoy that binds directly to free floating FA inhibitors with high affinity which neutralizes their anticoagulant effect.

Andexxa works by reversing anti-FXa activity in 2 minutes following bonus and sustaining reversal throughout the 2 hour IV infusion. Andexxa is the only FDA approved agent to reverse Xarelto and Eliquis related life-threatening bleeds.

Fisher & Paykel Healthcare, a world leader in heated humidification systems, introduces Optiflow™ for Nasal High Flow Therapy. In your Emergency Department, Optiflow™ delivers humidified gas, with or without supplemental oxygen, at flows up to 60 LPM for the treatment of your respiratory compromise patients. Clinical evidence proves that early implementation of Nasal High Flow Therapy, at flows up to 60L/min, can reduce escalation and risk of intubation. Reducing therapy escalation to mechanical ventilation (intubation/ NIV) can provide fewer ICU admissions, improved bed flow and reduced ED boarders.
